Art lovers turned up in hordes to check out the photography exhibition by S Vijayaraghavan, held at an art gallery in Banjara Hills recently.

Staying true to its title 'Traversing empirical spaces', the show displayed shots that captured the photographer's journeys across the globe.

The works spoke about the mundanity of our daily life through architecture, art, landscape and various elements of nature. Presenting an indepth analysis of the works, author Gita Hariharan and sculptor Merlin Ebhenzer spoke at length about them to the guests.
