

*“At the very heart of our conclusions is one, central conviction:  
the key to future progress in the developing world will be its ability  
to identify, to develop, and to retain expert and effective  
home-grown leadership.”*

HIS HIGHNESS THE AGA KHAN

*The Aga Khan Academy Hyderabad, 22 September 2006*

## THE AGA KHAN ACADEMY HYDERABAD

The Aga Khan Academy Hyderabad is a not-for-profit school situated on a 100-acre campus near the Rajiv Gandhi International Airport, just south of the city.

It is the second in a global network of day and residential schools for exceptional girls and boys from all backgrounds, drawn from across India and internationally. It features state-of-the-art facilities, a diverse student body, and an experienced and engaged team of educators and staff.

The Academy provides students with education of the highest international standard in order to prepare them for lives of leadership and service, and to succeed in a globally competitive world.

Admission to the Academy is based on merit. Students of promise, good character and serious intent are considered regardless of their socio-economic background and their family's ability to pay. Educators are selected on the basis of their commitment to the all-round development of students and their own continued professional development.

The Academy is committed to excellence in all aspects of education. This commitment includes the academic and enrichment programmes as well as the campus itself. The Academy strives to create a balance between academic demands, sports, cultural activities and community life. Students are challenged to be intellectually inquisitive and socially conscious. They are encouraged to engage with diversity and display a clear understanding of other people's cultures, social structures, values and beliefs.

The widely recognised International Baccalaureate (IB) programmes have been chosen as the foundation for the Academy's imaginative and inspiring educational vision. The Academy is an IB World School.

The curriculum stretches and challenges students, encouraging academic rigour, independent learning, enthusiastic inquiry, honesty and integrity in scholarship, and a caring and compassionate outlook. It promotes the international awareness, social responsibility, creativity and high ethical standards needed by leaders in the 21st century. It also prepares students to be effective in their own contexts as well as internationally by ensuring that they have an understanding of national language, history and culture. Students graduate with the IB Diploma, which is a highly respected qualification recognised by universities globally.

## THE AGA KHAN ACADEMIES NETWORK

In 2000, His Highness the Aga Khan initiated the establishment of the Aga Khan Academies as an integrated network of primary and secondary schools. The first Academy opened in Mombasa, Kenya in 2003. The second, in Hyderabad, India, began operating in 2011 with the enrolment of students in the Junior School; Senior School students, including residential students, joined in 2012. A third Academy opened in 2013 in Maputo, Mozambique and also began with the enrolment of students in the Junior School; the Senior School opened in August 2017.

Land has been acquired in other locations, and several additional Aga Khan Academies are in the architectural design process. When complete, the network of Academies will form a global learning community of 18 schools in 14 countries in Central and South Asia, Africa and the Middle East. Exchanges between Academies will allow students and teachers to experience a rich global dimension in education through collaboration and exchange programmes. Ultimately, this network will comprise 2,000 educators and a student body of 14,000 girls and boys, and will graduate 1,400 students of exceptional calibre every year.

The Academies are part of the Aga Khan Development Network (AKDN), which has been involved in education for over a century. AKDN agencies currently run two universities and more than 240 schools and educational programmes ranging from early childhood to post-graduate education. Aga Khan Academies students and teachers enjoy unparalleled opportunities for practical experience and learning by working with AKDN programmes. AKDN has a broad range of initiatives and partnerships in health, culture, rural development, institution building and the promotion of economic development that aim to improve living conditions and opportunities for the poor, regardless of faith, origin or gender.

## THE AIM

The Academy strives to develop future leaders with the skills, knowledge and dispositions to support positive development in their societies. It works toward this by admitting exceptional young people from all backgrounds and providing them with a rigorous and relevant education of the highest international standard.

The Academy prepares students to be intellectually curious, socially conscious and mindful of the need to be global citizens. The Academy's programme develops students who are able to understand and engage with complex issues of local, national and global significance.

## ACADEMIC PROGRAMME

The Aga Khan Academy Hyderabad is an IB World School that offers an integrated programme of education which includes the Primary Years Programme, Middle Years Programme and Diploma Programme.

The academic programme is both comprehensive and rigorous. It encompasses formal academics as well as themes that are designed to give students the skills to lead in their fields globally and locally.

The curriculum ensures that students' theoretical learning is linked to relevant local and international issues through the Aga Khan Curricular Strands, which address issues of ethics, pluralism, culture, governance and civil society, and economics for development.

The Academy's programme allows students to develop their understanding of the world, building their analytical skills, the ability to learn independently and the desire to make a difference. The International Baccalaureate learner profile, valued by IB World Schools, consists of a distinctive set of attributes that embody the mission of developing active, compassionate and lifelong learners. This has been extended by the Academies to include 'leaders' and 'stewards' as two additional qualities that students should aspire toward.

Additionally, the programme is designed to equip students with appropriate technical skills, providing them with the opportunity to explore how technology is shaping communities. Through an active, student-centred approach focused on mastery of several disciplines, the academic programme – together with enrichment programmes – give students the skills and ability to succeed in competitive universities worldwide.

### Primary Years Programme

The International Baccalaureate Primary Years Programme (PYP), for students aged 3–11, establishes the foundations for lifelong learning. It addresses social, physical, cultural and ethical requirements while giving students a strong foundation in all the major areas of knowledge. Learning is geared towards creating independence, confidence and respect for others. In their final year of the programme, students carry out an extended collaborative inquiry project, known as the PYP Exhibition, through which they investigate their own research question. It is an opportunity for students to exhibit the desired Academy learner profile attributes and understandings they have developed during their engagement with the PYP.

### Middle Years Programme

Students in the Middle Years Programme (MYP), aged 11–16, experience a challenging educational environment that emphasises the development of a range of skills including critical analysis, digital literacy and self-discipline. The MYP integrates the study of all major disciplines and culminates in a student-designed personal project. The programme also includes a service component designed to encourage students to become involved with their communities. The International Baccalaureate's Middle Years Programme is recognised by the Association of Indian Universities as an entry qualification to all junior colleges in India.

### Diploma Programme

The Diploma Programme (DP) for students aged 16–19 is a rigorous two-year course of study that balances breadth and depth of study across the full range of academic disciplines. Students also complete the IB core, including the Theory of Knowledge course, a 4,000-word Extended Essay, and the Creativity, Activity and Service (CAS) requirement. Each student's performance is assessed externally by independent examiners according to global standards applied to all IB schools.

The IB Diploma provides access to universities worldwide. The Academy provides strong support to students for career guidance and university admissions. Aga Khan Academies graduates have gained admission and scholarships at top universities around the world, including Yale University, Stanford University, Cornell University, University of California - Los Angeles, New York University, University of Toronto, University of British Columbia, McGill University, University College London, King's College London and University of Edinburgh.

## FACULTY

Great teachers are the core of a great school, and the Academy focuses on actively recruiting, carefully selecting and fostering the professional development of exceptional teachers. It identifies and develops teachers of the highest quality who are committed to both the all-round development of young people and to their own professional growth.

Providing ongoing development for teachers is a hallmark of Aga Khan schools worldwide. Achieving world-class standards, which evolve continually, is a dynamic process that requires continuous investment in the training and re-training of teachers to maintain a world-class faculty.

A distinguishing feature of each Academy is its Professional Development Centre (PDC), which is dedicated to developing new teachers to the highest standards while offering veteran teachers the opportunity to stay on the cutting edge of education through research and practice.

As more Academies are opening, a community of expertise is being created – and leveraged – through collaboration and physical exchanges. In addition to setting a high standard of instruction at the Academy, the PDC is serving to deepen the pool of well-trained educators regionally through its outreach efforts, where Academy teachers share their expertise to enhance teaching and learning at government and other schools.

The Academy currently has a student:teacher ratio of about 7.5:1. Once the Academy reaches full enrolment with 750 pupils, there will be approximately 90 teachers. A talented, experienced and diverse team of educators has been selected from a global pool, including Indian nationals, many with international experience. A permanent proportion from overseas will ensure the international mix of the educational experience on offer.

Academy faculty also engage actively with students outside the classroom. A high proportion of faculty live on campus, many as dorm parents. They ensure a safe, nurturing and fun-filled environment for residential students. Dorm parents are trained in matters related to health and safety, community life and interpersonal relations, and possess a high level of energy that allows them to handle multiple tasks while offering guidance and support to the students.

## RESIDENTIAL CAMPUS

The Academy's welcoming and inclusive culture is reflected in the peaceful and inviting architecture of the residences. Boys and girls live in separate student residences. All students are closely supervised by faculty and staff. The residential experience is characterised by an ethos centred on respect, integrity, honesty, fairness, empathy and good humour. Each student is supported in his or her personal growth by a staff member who is trained to bring out the best in each individual.

Because many of the least tangible but most important elements of an education – the development of practical leadership skills, the capacity to make ethical judgments, the ability to navigate through complex cultural settings – are formed outside the classroom, the residential programme is designed to promote the learning and growth that come from constant interaction with a diverse and talented group of teachers and peers. Mealtimes and other gatherings provide residential students with opportunities for informal interaction as well as for discussions, meetings, language development and study groups. This safe and secure environment gives students of all backgrounds the opportunity to thrive emotionally, intellectually and physically.

In general, students of a common age group share a room, and at higher grades, often doubles or singles are offered. The rooms are spacious with high ceilings and large windows. Other facilities include a student lounge with multimedia and entertainment equipment, dedicated study areas and a laundry facility. The Commons, the heart of the campus, houses the dining hall and an array of spaces for school activities.

## LEADERSHIP AND STUDENT LIFE

The academic curriculum is complemented by enrichment, athletic and community service initiatives that are designed to provide a balanced, well-rounded and comprehensive programme. Students gain an intense and enduring educational experience by engaging in a range of expression, action, and community and service activities with their peers and teachers.

Students are encouraged to do their best in all areas, both inside and outside the classroom, and to expand their horizons by trying new pursuits. The Academy's purpose-built campus and specialised facilities provide an ideal environment in which learning extends well beyond the classroom to all aspects of student life.

The extensive sports facilities include swimming and diving pools as well as tennis courts and sports fields for cricket, football, hockey and athletics. Students are able to pursue artistic and cultural activities in spaces dedicated to fine arts, music and dance, including individual music practice booths and a space for music recording. In addition, the campus landscape has been structured to include outdoor learning spaces as well as areas for social interaction and quiet reflection.

The Academy's enrichment programmes are clustered into three main streams, each with a different focus.

#### Expression

By engaging in visual or performing arts, students are encouraged to think creatively and express themselves across different media. Through theatre, art, music and drama, students learn to work together and give expression to the values and lessons they have learned.

#### Action

Through sports, both competitive and non-competitive, students are challenged in their physical abilities and learn values such as good sportsmanship, teamwork and ethical behaviour. They are encouraged to try different activities both as a method of personal discovery and as a way to extend the range of their abilities. They are also encouraged to work with teammates, to be motivated to do their personal best and to pass on what they have learned in the process.

#### Citizenship

The Academy encourages students to expand their knowledge and understanding of humanity and civil society and to recognise their responsibilities as members of both local and global communities. Through their involvement in citizenship activities, students gain an understanding of the practical implications of their work and studies. By collaborating with community groups on sustainable projects, they develop an appreciation for human rights and human dignity, and learn how their actions impact the world around them.

## AGA KHAN ACADEMY GRADUATES

His Highness the Aga Khan has underlined the importance of three concepts he sees as essential to creating, stabilising and strengthening democracies around the world: meritocracy, pluralism and civil society. The Academy strives to instil in its students the positive values embedded in these concepts – values they will embody and carry with them throughout their lives.

The Academy aims to create ethical leaders who have a strong sense of civic responsibility and who will go on to the best universities in the world and pursue careers of their choice. With multilingual abilities, they will move fluidly within both global and local contexts. They will become leaders in the governments and institutions of civil society in their own countries, in international organisations and in academic, economic and artistic institutions that create positive change in our world.

## THE ACADEMIES LEARNER PROFILE

Aga Khan Academy graduates are expected to become:

**Stewards** who are motivated to leave the world a better and more peaceful place;

**Inquirers** who are curious, independent learners;

**Knowledgeable** across a range of disciplines and traditions;

**Thinkers** who are critical and creative, who make reasoned, ethical decisions;

**Communicators** who express ideas confidently and creatively, orally and in writing, in at least two languages and through art and music;

**Principled** young people with a strong sense of integrity, honesty, fairness and justice, who respect the dignity of individuals, groups and communities, and who take responsibility for their own actions and their consequences;

**Open-minded** young people who understand and appreciate their own personal histories and cultures while recognising and valuing pluralism;

**Caring** people who are empathetic, compassionate and who respect others' needs and feelings while also being personally committed to making a positive difference in the lives of others and the natural environment;

**Courageous** learners who approach unfamiliar situations and uncertainty with confidence and forethought – independent spirits who are brave and articulate in defending their beliefs;

**Balanced** young men and women who understand the importance of maintaining personal well-being as well as physical, intellectual, spiritual and emotional balance for themselves and others;

**Reflective** individuals who give thoughtful consideration to their own learning and personal development and are able to productively analyse their own strengths and limitations; and

**Leaders** who perceive and anticipate needs and problems locally and globally and who are able to motivate themselves and others to tackle those problems confidently and in a spirit of cooperation.

Alumni from the Aga Khan Academies are studying at some of the top universities around the world. Many have been awarded prestigious and dedicated university scholarships, including the Mastercard Foundation Scholars Program, University of British Columbia International Leader of Tomorrow Award, Lester B. Pearson International Scholarship at the University of Toronto, King-Morgridge Scholars Program at the University of Wisconsin, University of Alberta Global Citizen Scholarship and the Aga Khan Academy Renewable Scholarship at the University of Victoria.

Through their choice of activities and career goals, Academies graduates are demonstrating a strong commitment to community service and the desire to support the long-term development of their countries and regions of origin.

## ADMISSIONS POLICY AND FINANCIAL AID

The Academy seeks students representing a diverse range of economic, cultural, ethnic and religious backgrounds. It looks for students who have the ability and motivation to excel academically and who demonstrate leadership in service and other co-curricular pursuits.

Applications to the Academy far exceed places. Selection is based on merit regardless of socio-economic background and ability to pay. Merit is broadly defined as exceptional intellectual potential, leadership, a commitment to learning, a strong sense of integrity, and the desire to work towards and instigate positive change. Financial aid is available to enable access for students with demonstrated financial need. The Academy endeavours to meet the financial needs of each selected student.

The Academy uses a multifaceted process to evaluate applicants. The assessments enable students to demonstrate their cognitive, literary, mathematical, creative and leadership abilities. The admissions committee then evaluates candidates based on a range of measures and recommends them for selection.

## THE AGA KHAN DEVELOPMENT NETWORK IN EDUCATION

The Aga Khan Development Network's education programmes cover a wide spectrum of activities aimed at addressing the full continuum of learning from early childhood to university education, including non-formal adult education. Education activities range from family and classroom-focused interventions to national and international policy dialogue. These activities are led principally by the following agencies and institutions, which work together as a system to strengthen education delivery and outcomes:

**The Aga Khan Academies (AKA)** are an integrated network of K–12 day and residential schools in Mombasa, Kenya; Hyderabad, India; and Maputo, Mozambique, with more campuses planned across Africa, South and Central Asia, and the Middle East. The Academies network aims to help develop these regions' future leaders. Each Academy admits exceptional young people from all backgrounds and provides them with a rigorous and relevant education of the highest international standard. Financial aid is available to ensure access for students from all socio-economic backgrounds.

**The Aga Khan Education Services (AKES)** operate more than 200 schools and educational programmes, providing quality preschool, primary and secondary education services to students (the majority girls) in many of the more remote regions in Africa, Asia and the Middle East. The first schools opened in 1905 in Mundra and Gwadar in South Asia, and in Zanzibar in East Africa.

**The Aga Khan University (AKU)** has campuses and programmes in Pakistan, Kenya, Tanzania, Uganda, Afghanistan and the United Kingdom. It operates teaching hospitals in Karachi and Nairobi, Schools of Nursing and Midwifery, Medical Colleges, Institutes for Educational Development, the Institute for the Study of Muslim Civilisations, the Graduate School of Media and Communications, the East African Institute and the Institute for the Study of Human Development. Planning for faculties of Arts and Sciences and graduate schools is underway for Pakistan and East Africa.

**The University of Central Asia (UCA)** was founded in 2000 and is the world's first university dedicated to education and research in mountain regions and societies. It is located on three campuses in Khorog, Tajikistan; Naryn, Kyrgyz Republic; and Tekeli, Kazakhstan. UCA consists of a School of Professional and Continuing Education, the School of Arts and Sciences (undergraduate) and the Graduate School of Development. The University provides three additional initiatives to build teaching and scholarly capacity in the region through its Central Asian Faculty Development Programme, the Aga Khan Humanities Project and its Research Programme.

**The Aga Khan Foundation (AKF)** works in partnership with governments, school faculties, parents and communities to develop affordable, innovative solutions that raise the quality and accessibility of their public school systems. On average per year these school improvement programmes reach about one million students (grades 1–12) through more than 29,000 trained teachers across 16 countries. Focus is also placed on early childhood development programmes and improving girls' education.

**The Aga Khan Trust for Culture (AKTC)** focuses on the physical, social, cultural and economic revitalisation of communities in the Muslim world. It operates a variety of education programmes through its museums and exhibitions initiatives, music initiatives, the Aga Khan Museum, the Aga Khan Program for Islamic Architecture and the ArchNet online architectural resource.

*“It has become commonplace to talk of an interconnected planet,  
with global communities of trade and finance, science and medicine,  
governance and diplomacy, education and culture. It is our intention that our  
Academy graduates will eventually become accomplished leaders in all of these fields...  
The ongoing objective in all of this work is to provide an outstanding education for  
outstanding students – to prepare men and women of exceptional ability  
to meet extraordinary challenges.”*
